This product contains an ingredient implicated in the recently announced Plainview Milk Products Cooperative recall due to potential Salmonella contamination. These products are not to be consumed or served.

We initiated this recall after learning that Plainview Milk Products Cooperative, a manufacturer that provided instant non-fat dry milk to one of our suppliers, was recalling some of its products because of the possible presence of Salmonella bacteria. Our records indicate that some of this instant non-fat dry milk was used in ingredients that were used to make the products identified above.

Salmonella is an organism which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy persons infected with Salmonella often experience fever, diarrhea (which may be bloody), nausea, vomiting and abdominal pain. In rare circumstances, infection with Salmonella can result in the organism getting into the bloodstream and producing more severe illnesses such as arterial infections (i.e., infected aneurysms), endocarditis and arthritis.

Please isolate any of these items with any of the listed lot numbers and destroy it. You should keep the product container that identifies the product's manufacture code to verify that a credit is due. If you have product stored out of the case and are unsure of the code date please destroy this product also. Your distributor will be able to issue you credit.

Please note that proper procedures must be followed and these cases may not be returned to your distributor.

Customers who have additional questions may contact Julie Estvander, our Director of Quality Assurance, at 912-651-4960 or via email at jdestvander@dcbrands.com.
